

Find Actions That Boost Both Integration And Autonomy

A simple experiment to help your team(s) move from either/or- to yes/and-thinking, and find solutions that address both sides of the coin.

Liberators**

Find Actions That Boost Both Integration and Autonomy

Organizations with self-managing Scrum teams face the difficult challenge of balancing their autonomy while keeping their work integrated with the rest of the organization. Because both of these aspects are equally desirable, and we can't simply make an either-or decision, we are faced with what is called a "wicked question".

Instead of letting the pendulum swing entirely to one side, this experiment is about finding ways of supporting both sides. With this approach, you help groups move from "either-or" to "yes-and" thinking. This experiment and its corresponding worksheet are based on the Liberating Structure [Integrated~Autonomy](#).

Difficulty / Effort

Required Skill

This experiment greatly benefits from tight facilitation and asking powerful questions to help the group move out of deadlocks.

Impact On Survival

As people start seeing that autonomy and integration are not opposed, more of both will be possible.

Steps

To try this experiment, do the following:

1. Invite people who have a stake in either increasing the autonomy of Scrum teams or keeping them integrated with work done elsewhere. This includes the Scrum teams themselves, departments they depend on (and vice versa), and management.
2. Begin by helping people make tensions between autonomy and integration tangible. Ask "For the Scrum teams, where in their work is there tension between the desire for autonomy and the desire for integration?" Start with a minute of silent thinking **1 min**, then invite people to share their ideas in pairs **2 min**. Capture salient examples from the whole group **5 min**. For example, there can be tension between the autonomy that Scrum teams have over their Sprint Backlog and the need to be able to pick up urgent issues from people outside the team that emerges during a Sprint. There can be tension between the autonomy of a Product Owner to order the Product Backlog and keeping that ordering aligned with corporate strategy. Or between allowing Scrum teams to pick their own tools and having mandated tools that are safe for corporate environments.
3. The next step is to explore actions that promote integration. For this step, the participants work with the Integrated~Autonomy worksheet. It shows three columns with space for writing down ideas that lead to either more integration (A), more autonomy (C), or both (B). The group will focus on column A first. Ask "What actions boost integration of the Scrum teams' activities with what is happening elsewhere?" Start with a minute of silent thinking **1 min**, then invite people to share their ideas in groups of four **5 min**. Capture the most salient actions from the small groups on the left side of the worksheet **10 min**.
4. As a follow-up, explore actions that promote autonomy. Ask "What actions boost the autonomy of Scrum teams?" Capture them in the right column of the worksheet. Start with a minute of silent thinking **1 min**, then invite people to share their ideas in groups of four **5 min**. Capture the most salient actions from the small groups on the right side of the worksheet **10 min**.
5. Now that you have actions that each address one side of the wicked question, help the group move into yes-and thinking. Ask "Which actions boost both integration and autonomy?" Capture them on the worksheet in the middle. Start with a minute of silent thinking **1 min**, then invite people to share their ideas in groups of four **5 min**. Capture the most salient actions from the small groups on the middle of the worksheet **10 min**.
6. Now that people have experience identifying actions that serve both sides, investigate earlier actions to see if they can be shifted to the middle. Ask "Which actions on the left or the right of the worksheet can be creatively modified to boost both integration and autonomy?" Start with a minute of silent thinking **1 min**, then invite people to share their ideas in groups of four **5 min**. Capture the most salient actions from the small groups on the middle of the worksheet **10 min**.
7. Order actions by their ability to promote both integration and autonomy and identify [15% Solutions](#) for the most impactful ones.

Our Findings

- Coming up with specific and tangible actions can be difficult. Keep asking "How would you do that for us?" or "What would that look like here?" in order to move groups beyond abstract ideas and platitudes (such as "more communication").
- If you have a large group, you can make each group of four responsible for one of the actions you identified during step 2. Let them fill in the entire worksheet in their small group from the perspective of that action.
- You can replace the sides—integration and autonomy—with other wicked challenges. For example, there is also tension between responding to change as quickly as possible and preventing huge mistakes. Or the tension between standardization on the one hand and customization on the other. Work with whatever wicked challenge makes the most sense!

Unleashing Teams All Over The World

We are The Liberators – Barry Overeem and Christiaan Verwijs. Our mission is to create data-driven products to unleash the superpowers of teams all over the world. We do this together with a growing community of patrons.

Awesome content for awesome teams

We unleash teams with our [blogposts](#), our [podcast](#), our [newsletter](#), our [videos](#), and our frequent [meetups](#). While we offer most of this for free, we also have plenty of premium content in [our webshop](#) for you to explore.

Supported by the community

We are super proud that The Liberators is almost entirely funded by the community. If you appreciate our work too, you can already support us for 12 dollars/year by becoming a [patron](#). In return, you gain free access to premium content, we share our work-in-progress and involve you in creating more awesome content.

Thank you for respecting our work!

We work hard to create high-quality content that puts you in a position to unleash your team. We're sure you appreciate that a lot of our time and money goes into this. At the same time, content like this is our main source of income. It's what pays our bills :)

If you purchased this content, we ask only that you treat our work with respect and don't share it with people outside your team. If you stumbled on it elsewhere without paying for it, and it offers you value, would you consider [supporting us too](#)? You can also check [out our other offerings](#).
