

Columinity

If teams thrive, the organization thrives

IMPROVE YOUR TEAMS, BOOST YOUR BUSINESS

Effective teams drive innovation, boost productivity, and keep both employees and customers satisfied. **Columinity** provides scientifically validated metrics to diagnose teams, identify risks and celebrate improvement. Use suggestions from our **science-based intelligent algorithms** to take action now.

TEAMS ARE THE ENGINES OF YOUR ORGANIZATION

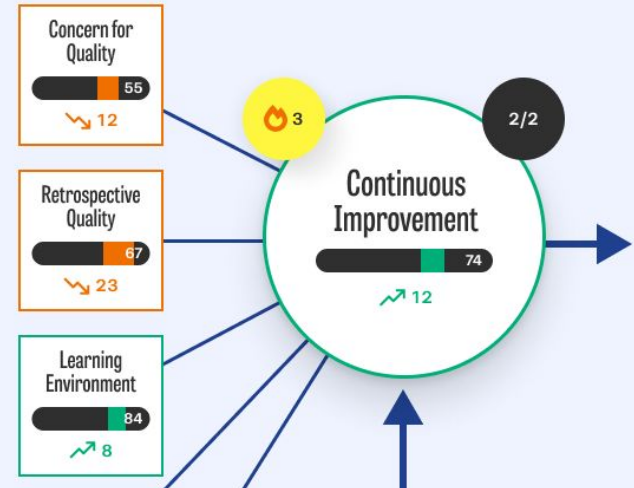

The success of every organization depends on how effectively **work flows** through teams. Teams are where strategies become reality. Where planning, problem-solving, and decision-making happen every day. When organizations face challenges—unclear direction, bottlenecks, or poor coordination—these issues show up first and most clearly within teams.

Columinity helps you see how work truly progresses through your organization. By evaluating teams, you gain actionable insights into collaboration, identify bottlenecks, and uncover the real drivers of performance.

MAKE DECISIONS BASED ON DATA INSTEAD OF GUT-FEELING

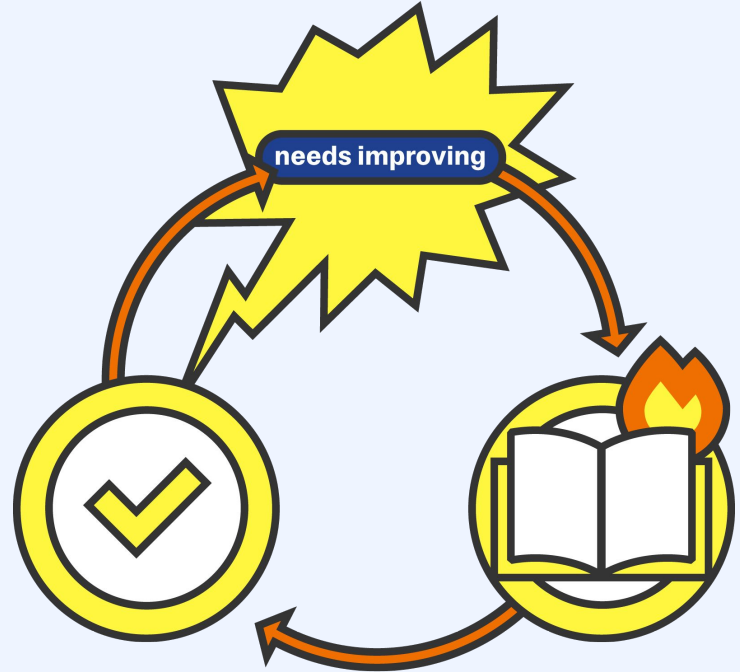

- Measure **30+ science-based metrics** across three scientific models that focus on team effectiveness, teamwork quality and Agile mindset.
- Invite **teams, stakeholders**, and **management** to scientifically validated surveys to get comprehensive insights across teams.
- Analyze results of individual teams, groups of teams or entire organizations with our **Teams Dashboard**.
- Use over **20 benchmarks** to compare the results to other industries, regions, organization sizes and levels of experience.
- Notice **trends** and **patterns** over time to identify risks, challenges and celebrate improvements.

ACT, IMPROVE, AND EVALUATE

Don't get stuck in analysis paralysis. Columinity provides immediate, actionable improvements to make your teams - and your business - more effective. It turns insights into action, so you can start improving right away.

Identify the highest-impact improvements with clear, evidence-based suggestions, quick tips and guides. Track performance over time, evaluate progress together, and uncover what to improve next. This continuous loop turns insight into momentum—keeping teams learning, adapting, and moving forward.

GROUNDING IN SCIENTIFIC RESEARCH

Opinions are easy, facts are not. This is why our models, questionnaires and feedback are grounded in scientific research.

- We offer three academic models to measure team effectiveness, teamwork quality, and the agile mindset
- We have survey data from over 15.000 teams globally.
- We offer benchmark data for sectors, organization size, world regions, scaling methodologies and top 100 teams.
- We have [published 3 peer-reviewed studies](#) to date to high-impact journals to be transparent about our methods.

Christiaan Verwijs

Organizational psychologist (MSc) with extensive professional experience in the field.

Prof Daniel Russo

Professor at Aalborg University with a PhD in Computer Science & Engineering.

Dr Karen Eilers

Business psychologist and at the University of Kassel and the University of St. Gallen.

SERIOUS ABOUT PRIVACY

We care about the privacy of your employees and adhere to strong protections for anonymity, privacy and security.

- We collect **very little** personal data, only email addresses (optional).
- We remove personal data when it isn't needed for functional purposes.
- We don't sell personal data or make it available to third parties.
- We use strong anonymization protections to protect privacy.
- We are compliant with the European Data Protection Regulation (GDPR).
- We only use anonymized data for scientific research (to your benefit)

Review our [privacy policy](#) and [data protection agreements](#) for details.

COLUMNINITY'S RETURN ON INVESTMENT

Improve productivity and reduce unnecessary work

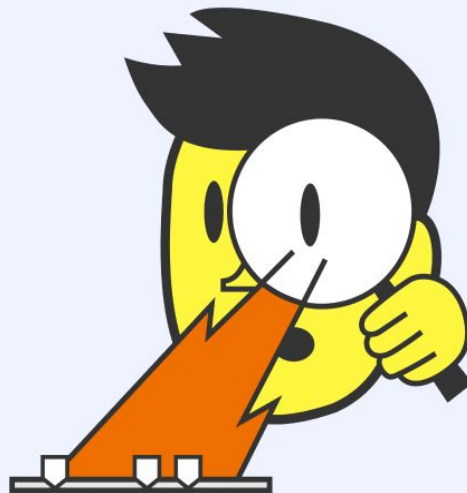

With its focus on stakeholder value and shared goals, Columinity measures how well teams are aligned with broader strategy and stakeholder needs. Misalignment can be detected and reduced through our evidence-based suggestions.

Reduce turnover costs

Columinity tracks team morale through key well-being indicators like psychological safety, shared learning, and leadership support—helping you catch issues early.

Optimize costs for coaching & training

Columinity helps teams self-diagnose and notice where support is needed, giving organizations the insight to target coaching and training where it is actually needed.

WHY COLUMINITY IS ENGLISH-ONLY

Not every team works comfortably in English — we know this can be a real limitation. Columinity uses **psychometrically validated questionnaires**, tested with over 1,000 teams. To maintain that level of scientific reliability, each translation would need to be professionally done and revalidated with 1,000+ teams per language. Otherwise, we can't be sure the questions still measure the same thing.

We've explored community translations but keeping them aligned with ongoing updates while **preserving scientific accuracy is incredibly complex**.

Some teams use browser tools like **Google Translate** to get started — not perfect, but often good enough. We're actively exploring how AI can help us offer accurate, context-aware translations. It's not a matter of *if*, but *when* translations become possible — and we're excited about the possibilities!
