

Columinity

**Improve the drivers of team
and business performance**

IMPROVE THE DRIVERS BEHIND TEAM AND BUSINESS PERFORMANCE

Traditional KPIs, productivity and velocity metrics show you **what** is happening in your organization, but not **why**. Sustainable performance depends on human factors such as goal clarity, teamwork, capability, leadership support, and stakeholder alignment.

By measuring over 30 scientifically validated human factors, Columinity reveals the underlying bottlenecks and performance issues of your **teams and business**. It shows where targeted interventions will have the greatest impact. Start having better conversations and begin improving today.

CORE FEATURES OF COLUMINITY

For management and other team-supporting roles

- ✓ Comparable, science-based human factor metrics
- ✓ Industry benchmarks
- ✓ Organization-wide insights dashboard
- ✓ Identify bottlenecks and risks early

For teams that deliver products or services to stakeholders

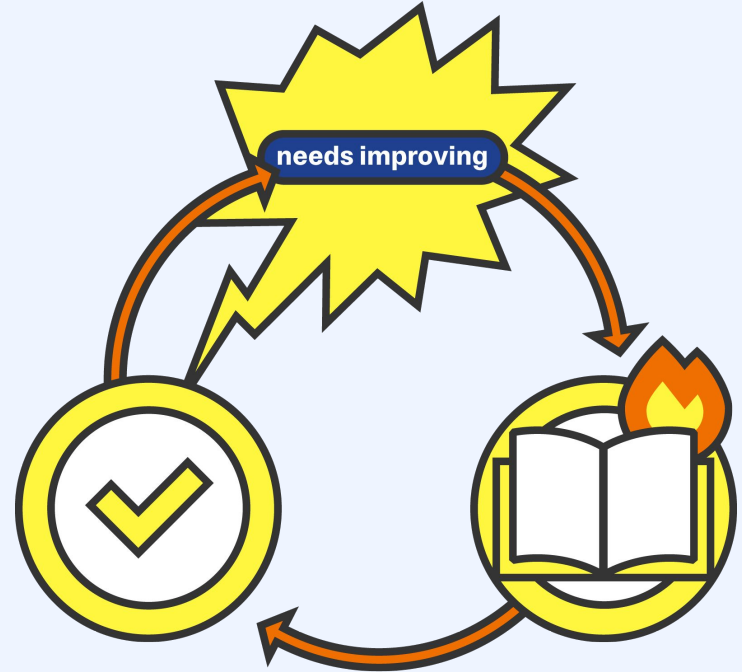

- ✓ Three different peer-reviewed scientific models to suit your context
- ✓ 360 degrees feedback from team members, customers & supporters
- ✓ Actionable, evidence-based feedback
- ✓ Self-service improvement cycle
- ✓ Strong privacy and anonymity safeguards (EU GDPR compliant)

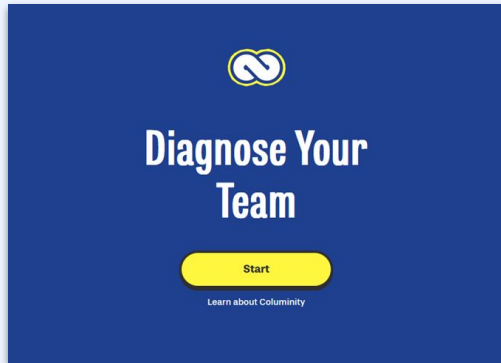

TARGETED INTERVENTIONS OVER BROAD INITIATIVES

Rather than launching generic change programs, Columunity shows where intervention is actually needed and where it is not. Our **predictive algorithms** highlight improvements with the highest ROI. Actionable feedback enables teams to begin improving and aligning today.

Track performance drivers over time, evaluate progress together, and uncover what to improve next. This learning loop turns insight into momentum, and keeps teams - **and your business** - adapting and moving forward.

1. DIAGNOSE

Scan your teams

Questions about Outcomes

Stakeholders are generally happy with what this team delivers.

Completely disagree 1 2 3 4 5 6 7 Completely agree

Question doesn't apply

I find the work that I do for this team full of meaning and purpose.

Completely disagree 1 2 3 4 5 6 7 Completely agree

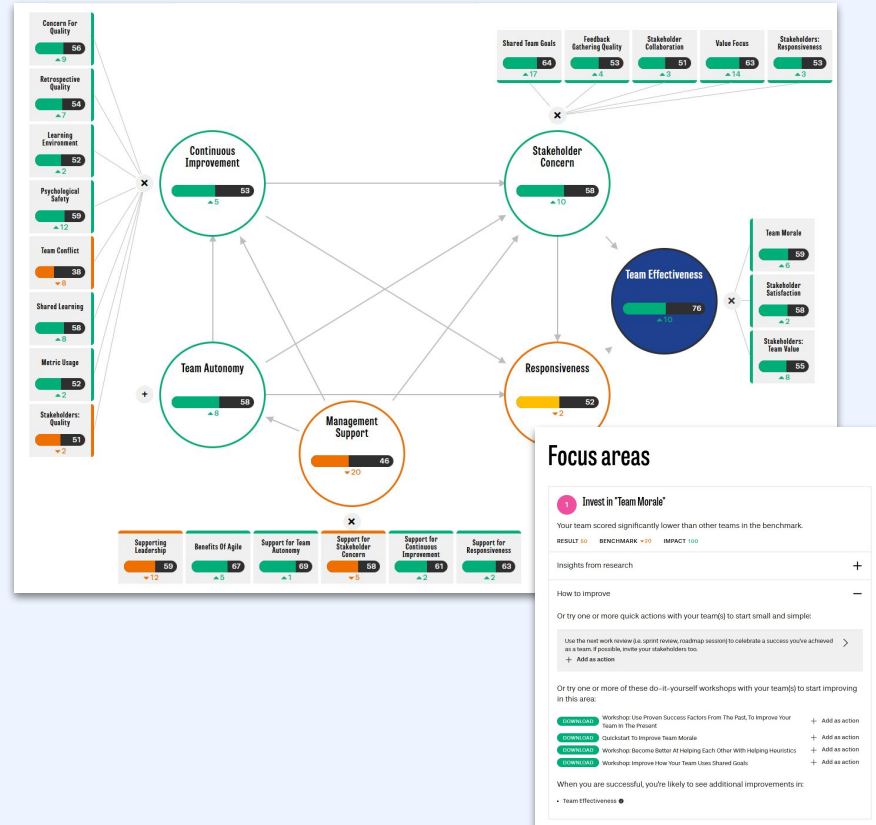

Question doesn't apply

with practical feedback

2. ACT

Analyze the results collaboratively

Keep track of improvement actions

Focus areas

Based on the data, we recommend to focus on the following areas:

- 1 Invest in **Team Morale** to improve Team Effectiveness IMPACT 100 [discover how >](#)
- 2 Invest in **Stakeholders: Quality** to improve Team Effectiveness IMPACT 95 [discover how >](#)
- 3 Invest in **Stakeholders: Team Value** to improve Team Effectiveness IMPACT 95 [discover how >](#)

[more recommendations >](#)

Identify improvement actions
with the highest likely ROI

3. EVALUATE

Repeat

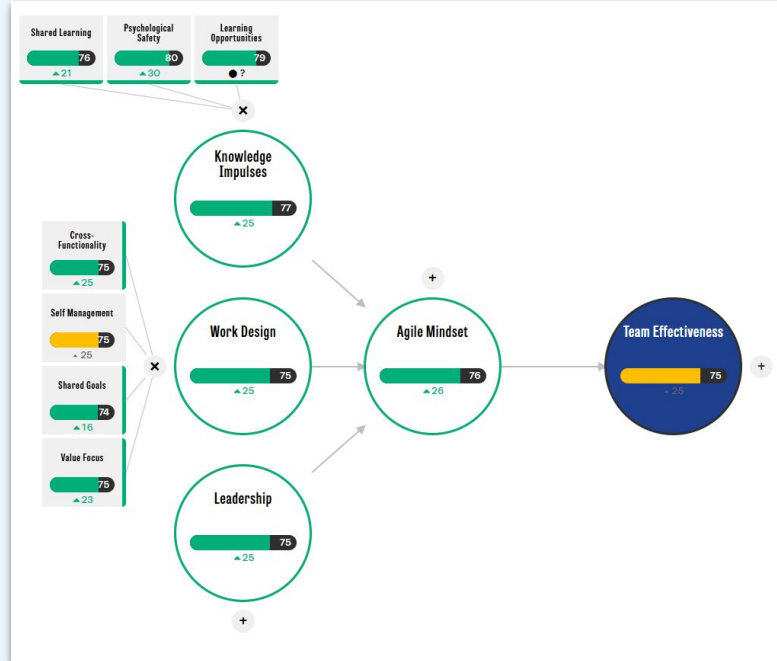

Measure your team again to see where you improved:

- ✓ The new Team Report highlights changes from this Team Report.
- ✓ Evaluate how well your improvement actions actually worked.
- ✓ Celebrate improvements together.
- ✓ Measure the impact of training, workshops and coaching.
- ✓ Select the same or different topics – its up to you.
- ✓ Use our Teams Dashboard (paid plans) to aggregate data from many teams.

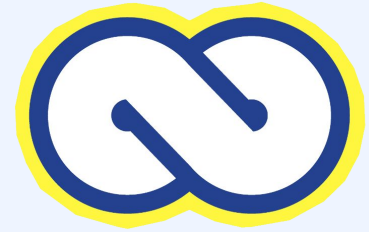

∞ Repeat now

🔔 Set reminder

Measure again

Celebrate where improvement occurred
and identify where work is still needed

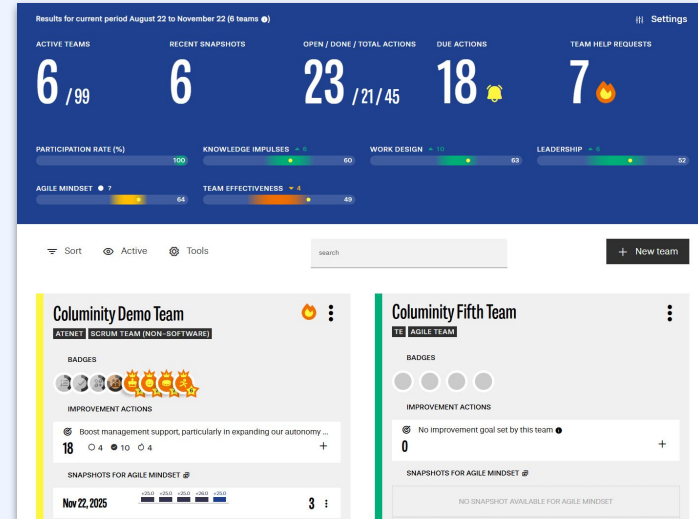

Repeat

4. ALSO AT ORGANIZATIONAL LEVEL

Aggregate data from many teams and analyze patterns

Teams can raise help requests to signal they need help from management and coaches

GROUNDING IN SCIENTIFIC RESEARCH

Opinions are easy, facts are not. This is why our models, questionnaires and feedback are grounded in scientific research.

- We offer three academic models to measure team effectiveness, teamwork quality, and the agile mindset
- We have survey data from over 25.000 teams globally.
- We offer benchmark data for sectors, organization size, world regions, scaling methodologies and top 100 teams.
- We have [published 3 peer-reviewed studies](#) to date to high-impact journals to be transparent about our methods.

Christiaan Verwijs

Organizational psychologist (MSc) with extensive professional experience in the field.

Prof Daniel Russo

Professor at Aalborg University with a PhD in Computer Science & Engineering.

Dr Karen Eilers

Business psychologist and at the University of Kassel and the University of St. Gallen.

SERIOUS ABOUT PRIVACY

We care about the privacy of your employees and adhere to strong protections for anonymity, privacy and security.

- We collect **very little** personal data, only email addresses (optional).
- We remove personal data when it isn't needed for functional purposes.
- We don't sell personal data or make it available to third parties.
- We use strong anonymization protections to protect privacy.
- We are compliant with the European Data Protection Regulation (GDPR).
- We only use anonymized data for scientific research (to your benefit)

Review our [privacy policy](#) and [data protection agreements](#) for details.
